# Ride the MTR Safely Every Day

## Ride the MTR Safely Every Day

The MTR has always regarded safety as its primary responsibility.

A stringent set of safety standards was followed when we built the system.

In addition, we have a comprehensive and exhaustive set of safety standards in place which is strictly adhered to in our daily operation.

Continuous success in running a safe railway system requires not only our dedication but also your support and co-operation.

This booklet provides you with necessary information about safety and security in the MTR and will help you understand how you can assist in ensuring a safe journey for both you and your fellow passengers.

You are invited to help us maintain a safe railway and to provide us with any comments or suggestions by using the Passenger Suggestions Form available in every station as we strive for continuous improvement.

We count on your support to make every journey on the MTR a safe and enjoyable one.

# For your safety - Hold the handrail

## General requirements

- Smoking is not allowed
- Read notices, listen to announcements and always follow instructions
- Take extra care of children and the elderly
- Take extra care if it is raining, as the floor may be wet

- Never play, jostle, run or push anywhere in the MTR
- Contact MTR staff if you need help or assistance and inform staff immediately in the event of an accident
- Use safety and emergency facilities in the correct manner
- Never enter an MTR Restricted Area

## Don't bring these items into MTR premises:

- Bulky objects or goods
- Dangerous or flammable goods, e.g. paints, thinners, pressurized gas cylinders (see page 30 for additional information)

- Metallic balloons
- Trolleys loaded with goods
- Animals, birds, or livestock (except guide dogs)

## Entry / Exit Gates

- Before passing through an entry/exit gate, validate an Octopus card or insert a ticket to ensure that the arrow sign is illuminated and the "please enter" or "please exit" message is displayed
- Before passing through a wide gate, wait behind the yellow line until the gate area is clear; validate an Octopus card or insert a ticket and ensure that the arrow sign is illuminated and the "please proceed" or "please exit" message is displayed
- Do not run through the gate
- Always look after young children
- Always give priority to passengers in need

## Escalators / Moving Walkways

**When stepping on an escalator / moving walkway:**

- Be aware of the direction of the escalator or moving walkway before stepping on
- Take extra care when stepping on
- Keep loose clothing clear of steps and edges
- Do not wait or stand in the landing areas
- Do not travel on an escalator with trolleys, bulky baggage, baby prams or wheelchairs

**When riding on an escalator / moving walkway:**

- Always hold the handrail
- Always face forwards
- Stand firm and don't walk
- Stand clear of the edges
- Always watch your steps if wearing sandals or slippers
- Do not lean against the sides or rest on the handrail
- Do not sit on the escalator step
- Do not run, play or jump

**When stepping off an escalator / moving walk-way:**

- Step off promptly
- Move away from the landing area immediately

**General safety guidelines**

- Look after children and offer assistance to the elderly
- Always use lifts when carrying bulky baggage, using a baby pram, or a wheelchair
- Take extra care when an escalator is stopped and used as a fixed staircase as height of steps will vary
- In the event of an accident immediately press the Emergency Stop button

## Lifts

**Use the lift if you:**

- Are Elderly or looking after young children
- Have impaired mobility
- Are travelling with trolleys, baggage, bulky items or baby prams

**When using the lift:**

- Always give priority to passengers in need
- Allow passengers to exit before entering
- Do not overload the lift
- Stand back and keep your body away from the lift doors
- Keep your belongings well clear of the doors
- Do not force the lift doors open
- If the lift stops between floors or the doors fail to open, press the Emergency Alarm button, remain calm and wait for assistance

## On the platform

- Keep passageways, tactile guide path, staircases and escalators clear of obstructions
- Wait in line and only in areas indicated by arrows or queuing lines
- Do not wait or place belongings in areas marked to be kept clear

- Let passengers exit train cars before boarding
- Be aware of the gap between the platform and the train

- Do not rush in or force your way out of a train when the warning chimes sound or the doors are closing
- Do not let your body, handbag, rucksack or other personal belongings block the closing train doors / platform screen doors

- Never go beyond the barriers at the ends of platforms
- If help or assistance is required, use the Help Line to speak to MTR staff*
- In an emergency, use the Emergency Train Stop button to stop the train*

*(*Not available in Light Rail)*

## Platforms without platform screen doors or automatic platform gates

- Stand behind the yellow line and form a queue
- Ensure all belongings are also behind the yellow line
- Take extra care if it is raining, as the floor may be wet

## Platforms with platform screen doors

- Stand back and form a queue
- Do not lean against the platform screen doors
- Do not place your hand on any part of the platform screen doors

## Platforms with automatic platform gates

- Stand behind the yellow line and form a queue
- Do not lean on the automatic platform gates
- Do not let any part of your / your child's body protrude beyond the gates
- Never sit children or place bags, cameras or anything else on top of the gates

## On the track

Never under any circumstances trespass onto the track

**If you accidentally fall from a platform onto the track:**

- Keep calm
- Shout for help
- Make sure your body is clear of the rails
- If possible, try to lie in the space underneath the platform edge or between the rails and the wall where there is more clearance

- Wait for MTR staff to assist you back onto the platform

**If you see someone fall onto the track**

- Press the Emergency Train Stop button at platforms wherever available*
- Immediately report the incident to MTR staff
- Never go down to the track by yourself

**If something drops onto the track:**

- Ask MTR staff for assistance
- Never try to reach down to pick things up

*(*Not available in Light Rail)*

## On the train

- Stand clear of the doors; keep hands and fingers clear of the gap between the train and the doors
- Do not let your body, handbag, rucksack or other personal belongings block the closing doors
- Move into the centre of the train compartment
- Always hold onto the handrail or strap hanger tightly
- Do not lean against the grab poles
- Offer your seat to anyone in need
- Do not sit on the train floor
- Place baggage in designated areas; do not leave it where it might cause an obstruction
- Pay attention to on-board announcements and visual messages
- Only operate the Emergency Call handle / Call button in an emergency. If you feel unwell, ask station staff for assistance at the next station

## Disneyland Resort Line

- Do not attempt to open the glass partition door in the train unless instructed to do so by MTR staff in an emergency

## Light Rail

### Light Rail Platforms

- Do not run; be careful when walking up and down steps
- Stay away from platform edges and wait behind the yellow line
- Mind the gap between the platform and the Light Rail Vehicle
- Take extra care if it is raining, as the platform floor may be wet
- Keep passageways and tactile guide path clear of obstructions
- Do not rush in or force your way out of a Light Rail Vehicle when the warning chimes sound or the doors are closing
- Do not let your body, handbag, rucksack or other personal belongings block the closing doors

### Travelling on Light Rail Vehicles

- Always hold the handrail or strap hanger tightly
- Stand clear of the doors; keep hands and fingers clear of the gap between the Light Rail Vehicle and the doors
- Do not let your body, handbag, rucksack or other personal belongings block the closing doors
- Move into the centre of compartment
- Do not lean on the grab poles
- Offer your seat to anyone in need

## Light Rail

### When crossing the Light Rail pedestrian crossing

- Obey pedestrian signals
- Wait behind the yellow line and take note of the "Look left" or "Look right" indication before crossing
- Listen for audio warnings from Light Rail vehicles
- Dismount from bicycles and walk them across Light Rail crossings
- Do not talk on mobile phones or listen to music when crossing
- Do not stay in the crossing area

### When driving at Light Rail Junctions

- Obey the traffic lights
- Select the correct lane when turning at Light Rail junctions
- Lower cranes and tighten-up loose items before moving off in a goods vehicle
- Slow down and be ready to stop when approaching Light Rail junctions
- Keep a safe distance from the vehicle in front

## Bus

**Travelling on Bus**

- Do not board or alight while the bus is in motion
- Always hold the handrail tightly after boarding
- Fold up the baby prams after boarding
- Do not stand on the upper deck or staircase
- Do not obstruct the staircase aisle or doorways
- Secure the wheelchairs at designated space and fasten the safety belt properly
- Fasten the seat belt properly wherever applicable
- Move into the centre of the bus compartment
- Offer your seat to anyone in need

**Be safe and considerate**
**Never force your way into the train**

## Station emergency equipment

*(Stations are equipped with different types of standard emergency equipment)*

**Passenger information display system**

- In an emergency, the passenger information display system will display specific evacuation messages

**Illuminated exit signs**

- In an emergency, follow the evacuation route indicated by the illuminated exit signs

**Fire alarm call points**

- In the event of a fire, break the glass at the nearest fire alarm call point

**Fire hydrants, hose reels and fire extinguishers**

- Use only in accordance with the specific instructions when safe to do so

**Smoke detection systems, smoke extraction systems, ventilation system, sprinkler system**

- These equipment operate automatically in the event of fire or dense smoke

**Emergency Stop button on escalators / moving walkways**

- Emergency Stop buttons are located on all escalators and moving walkways that can be used to stop them in an emergency

## Platform emergency equipment

*(Platforms are equipped with different types of standard emergency equipment)*

### Emergency Train Stop

- The Emergency Train Stop buttons / plungers are located on the platforms

### Platform screen doors - emergency escape door

*(From trains to platforms)*

- Emergency escape doors for evacuating passengers from the train to the platform are located at either end of the platform
- They can be opened manually by pressing down the push bar or lever

### Help Lines

- Help Line telephones connect to the station control room

## Train emergency equipment

*(Trains are equipped with different types of standard emergency equipment)*

### Emergency Call handle / Call button

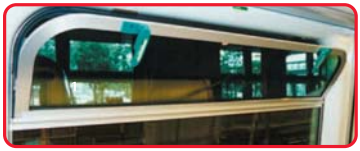

- Pull the Emergency Call handle / press the Emergency Call button and use the microphone to speak to the train captain in an emergency
- If you feel unwell, ask station staff for assistance at the next station

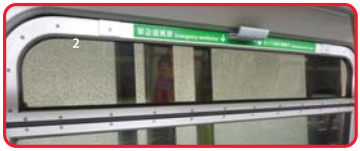

### Ventilation windows

- Windows can be opened for ventilation in an emergency when instructed to do so by the train captain

### Fire extinguishers

- Fire extinguishers are provided inside trains.
- Use only in accordance with the instructions when safe to do so

### Emergency exit doors

Emergency exit doors are only used under the instructions and directions from MTR staff or emergency service personnel when an evacuation takes place

Tsuen Wan line,Kwun Tong Line, Island Line and Tseung Kwan O Line

Tung Chung Line / Airport Express Line

West Rail Line, East Rail Line and Ma On Shan Line

East Rail Line

Light Rail

### Emergency door release

- This is used on the instruction of the train captain when there is a need to open train doors to evacuate from a train compartment

- Passengers must always be aware of the surrounding environment before using this route to evacuate from the train

## Emergency procedures

### Evacuation from the station

- Remain calm
- Pay attention to station announcements and visual messages
- Use the nearest exit and immediately leave the station as directed by MTR staff, emergency services personnel or as indicated by illuminated exit signs
- Use the nearest escalator or staircase to leave.
- Do not use the lift

### Evacuation from the train

- Remain calm
- Pay attention to train announcements and visual messages
- Evacuation from the train will normally be carried out at the nearest station
- Only under exceptional circumstances will an evacuation take place between stations
- Follow the instructions and directions from MTR staff or emergency service personnel

### Passengers with disabilities and those who require assistance

- Seek assistance from other passengers
- If safe to do so, wait for MTR staff or emergency services personnel

## Emergency procedures

**Fire**

- Inform MTR staff immediately if you see smoke / fire or smell burning
- Offer assistance to anyone in need or persons with disabilities move to a safe location

**Fire on a train**

- Report the fire to the train captain by using the Emergency Call handle or Call button and speaking into the microphone
- If safe to do so, use the fire extinguisher
- Do not open the ventilation windows unless instructed to do so
- In the event of a train evacuation, follow the instructions given by MTR staff or emergency services personnel to evacuate the train
- If there is a fire outside the train, stay inside the train compartment, remain calm and follow MTR staff instructions

**Fire in the station**

- Report the fire to MTR staff or operate the fire alarm call point (break glass)
- Follow the instructions given by MTR staff or emergency services personnel to evacuate the station
- Do not use the lift

# Be alert ! Suspicious objects

## Dangerous Goods

Under the Dangerous Goods Ordinance, Dangerous Goods are classified into 10 categories. Some examples are listed below:

| | |
|---|---|
| Category 1: | fireworks, fire crackers |
| Category 2: | LP gas, pressurized gas cylinders |
| Category 3: | acids, battery fluid |
| Category 4: | bleaches, paint remover, cyanides |
| Category 5: | thinners, kerosene, petroleum (or diesel) |
| Category 6: | raw materials of active metals (calcium, magnesium, etc) |
| Category 7: | peroxides (such as concentrated hydrogen peroxide) |
| Category 8: | combustible industrial raw material |
| Category 9: | white or yellow phosphorus |
| Category 9a: | raw polystyrene foam, raw rubber pellets, rubber tyres |
| Category 10: | chemical processing raw materials (hardening agent for glassfibre and epoxy products) |

**MTR staff have the legal right to refuse entry to any part of the MTR of any passenger carrying Dangerous Goods or permitted goods in large quantities.**

## Your safety and security

All public areas of the MTR are regularly patrolled by MTR staff and the Police. Mirrors and closed circuit TV cameras are located in strategic positions to assist in deterring crime. Nevertheless, we still need your assistance to keep the railway safe.

## Keep a watchful eye and take appropriate action

If you witness a crime or see something suspicious such as:

- Passengers behaving oddly
- Unattended baggage, backpack, parcels, or other objects
- Passengers carrying dangerous or flammable goods
- Any incident or anything suspicious or unusual

Report it to MTR staff or the Police immediately.
