Travel safely every day in the MTR

Message from the MTR

Travel safely every day in the MTR

The MTR considers safety its primary responsibility.

A stringent set of safety standards was followed when we built the system.

In addition, we have a comprehensive and exhaustive set of safety standards in place which is strictly adhered to in our daily operation.

Maintaining a safe railway system requires not only our dedication but also your support and co-operation.

This booklet provides you with necessary information about safety and security in the MTR and will help you understand how you can assist in ensuring a safe journey for both yourself and your fellow passengers. Not following these guidelines could result in personal injury or prosecution under MTR By-laws. Your understanding and co-operation will help us enhance safety awareness in the railway system.

As we strive for continuous improvement, you are invited to help us maintain a safe railway and to provide us with any comments or suggestions by using the Passenger Suggestions Form available in every station.

We count on your support to make every journey on the MTR a safe and enjoyable one.

For your safety - Hold the handrail

Safety guide

General requirements

- Smoking is not allowed
- Read notices, listen to announcements and always follow instructions
- Take extra care of children and the elderly
- Take extra care if it is raining, as the floor may be wet
- Never play, jostle, run or push anywhere in the MTR
- Contact MTR staff if you need help or assistance and inform staff immediately in the event of an accident or an emergency
- Use safety and emergency facilities in the correct manner
- Never enter an MTR Restricted Area
- Do not release paper sky lanterns anywhere near railway lines

Don't bring these items into MTR premises:

- *Baggage with total dimensions (i.e. length, width and height) exceeding 170 cm or the length of any one side exceeding 130 cm
- Heavy objects that could cause hazard or inconvenience to other passengers
- Dangerous or flammable goods, e.g. paints, thinners, LP gas (see page 26 for additional information)
- Metallic balloons
- Trolleys loaded with goods
- Animals, birds, or livestock (except guide dogs)

*Except in Airport Express

Entry / Exit gates

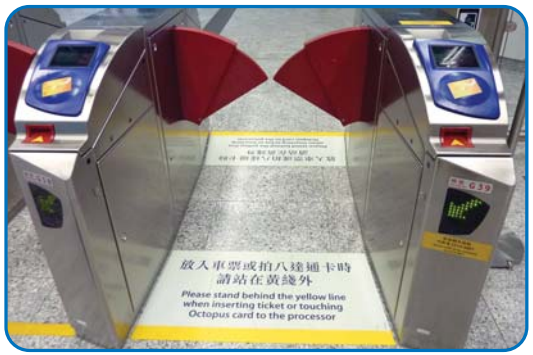

- Before passing through an entry / exit gate, place your Octopus card on the processor or insert your ticket* to ensure that the arrow sign is illuminated and the "please enter" or "please exit" message is displayed
- Do not run through the gate
- Always look after children

Wide gates

- Before passing through a wide gate, wait behind the yellow line until the gate area is clear; place your Octopus card on the processor or insert your ticket* and ensure that the arrow sign is illuminated and the "please enter" or "please exit" message is displayed
- Stand close to the baby pram while passing through the gate
- Always give priority to passengers in need

* *At Airport Express entry gates, touch the smart ticket to the processor*

Escalators or moving walkways

When stepping onto an escalator or moving walkway:

- Be aware of the direction of the escalator or moving walkway before stepping on
- Take extra care and stand firm when stepping on
- Keep loose clothing and shoelaces clear of the step edges
- Do not wait or stand in the landing area

When riding on an escalator or moving walkway:

- Always hold the handrail
- Always face forwards
- Stand firm and don't walk
- Stand clear of the step edges
- Always watch your step if wearing sandals or slippers
- Do not lean against the sides or rest on the handrail
- Do not sit on the escalator step
- Do not run, play or jump
- Take extra care when stepping off

When stepping off an escalator or moving walkway:

- Step off promptly
- Move away from the landing area immediately

General safety guidelines

- Look after children and offer assistance to the elderly
- Do not carry any excessively long object*
- Keep your feet clear of the side edges
- Take extra care when an escalator is stopped and used as a fixed staircase as the height of steps will vary
- In the event of an accident immediately press the Emergency Stop button

** Refer to the allowable dimensions in P.4*

Lifts

Use the lift if you:

- Are elderly or looking after children
- Are mobility impaired or wheelchair users
- Are travelling with trolleys, baggage, bulky items or have a baby in a baby pram

When using the lift:

- Always give priority to passengers in need
- Allow passengers to exit before entering
- Keep belongings clear of the doors
- Do not overload the lift
- Stand back and keep your body away from the lift doors
- Do not force the lift doors open
- If the lift stops between floors or the doors fail to open, press the Emergency Alarm button, remain calm and wait for assistance

On the platform

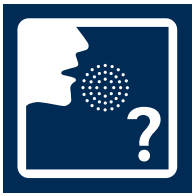

- Wait in line and only in areas indicated by arrows or queuing lines
- Let passengers exit from the train before boarding
- Be aware of the gap between the platform and the train
- Move to platform areas with more space according to the instructions of staff

- If your handbag, backpack or other personal belongings are caught in the closing train doors, let go immediately. Do not continue to hold or attempt to pull trapped objects free

- Do not let your body, handbag, backpack or other personal belongings block the train doors, platform screen doors or automatic platform gates as they are closing
- Do not rush in or force your way out of a train when the warning chimes sound or the doors are closing

- Never go beyond the barriers at the ends of platforms
- If help or assistance is required, use the Help Line to speak to MTR staff
- In an emergency, use the Emergency Train Stop button to stop the train
- Motorised wheelchair users should travel at a speed equivalent to a walking pace inside stations especially at platforms

Platforms without platform screen doors or automatic platform gates

- Stand in line behind the yellow line
- Ensure all belongings are also behind the yellow line
- Take extra care if it is raining, as the floor may be wet or slippery

Platforms with platform screen doors

- Stand behind the yellow line in the area marked by the arrows
- Do not lean against platform screen doors
- Do not place your hand on any part of the moving platform screen doors

Platforms with automatic platform gates

- Stand behind the yellow line in the area marked by the arrows
- Do not lean on the automatic platform gates
- Do not let any part of you or your child's bodies protrude beyond the gates
- Never sit children or place any part of your body, bags, cameras or other objects on top of the gates

On the track

Never under any circumstances trespass onto the track

If you accidentally fall from a platform onto the track:

- Remain calm
- Shout for help
- Ensure your body is clear of the rails
- If possible, try to lie in the space underneath the platform edge or the space between the rails and the wall where there is more clearance
- Wait for MTR staff to assist you back onto the platform

If you see someone fall onto the track

- Press the Emergency Train Stop button on the platform wherever available
- Immediately report the incident to MTR staff
- Never attempt to go down onto the track

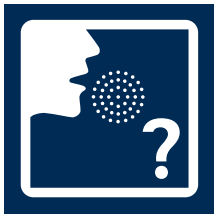

If something drops onto the track:

- Ask MTR staff for assistance
- Never try to reach down to pick up the object

On the train

- Move into the centre of the train compartment
- Always hold onto the handrail or strap hanger
- Place baggage in designated areas; do not leave it where it might cause an obstruction
- Offer your seat to anyone in need
- Pay attention to on-board announcements and the electronic display messages
- Wheelchair users should secure their wheelchair in the multi-purpose space
- Stand clear of the doors; keep hands and fingers clear of the gap between the train and the doors
- Ensure that your body, handbag, backpack or other personal belongings do not block the doors as they are closing
- Do not lean against the grab poles
- Do not sit on the train floor
- Only operate the Emergency Call handle or Call button in an emergency. If you feel unwell, ask station staff for assistance at the next station

Be safe and considerate Never force your way into the train

Station emergency equipment

(Stations are equipped with different types of standard emergency equipment)

Passenger information display system

- In an emergency, the passenger information display system will show specific evacuation messages

Illuminated exit signs

- In an emergency, follow the evacuation route indicated by the illuminated exit signs

Fire alarm call points

- In the event of a fire, break the glass at the nearest fire alarm call point

Fire hydrants, hose reels and fire extinguishers

- Use only in accordance with the specific instructions and only when safe to do so

Smoke detection system, smoke extraction system, ventilation system, sprinkler system

- This equipment is designed to operate automatically in the event of fire or dense smoke

Emergency Stop button on escalators or moving walkways

- Emergency Stop buttons are located on all escalators and moving walkways and can be used to stop them in an emergency

Platform emergency equipment

(Platforms are equipped with different types of standard emergency equipment)

Emergency Train Stop

- Emergency Train Stop buttons or plungers are located on every platform

Platform screen doors - emergency escape door

(From trains to platforms)

- Emergency escape doors for evacuating passengers from a train to a platform are located at either end of the platform
- They can be opened manually by pressing down the push bar or lever

Help Lines

- Help Line telephones connect directly to staff in the station control room

Train emergency equipment

(Trains are equipped with different types of standard emergency equipment)

Emergency Call handle or Call button

- Operate the Emergency Call handle or the Emergency Call button then use the microphone to speak to the train captain in an emergency
- If you feel unwell, ask station staff for assistance at the next station

Ventilation windows

- In an emergency, windows can be opened for ventilation if following instructions to do so by the train captain

Fire extinguishers

- Fire extinguishers are provided inside trains
- Use only when safe to do so following instructions from MTR staff

Emergency exit doors

- Emergency exit doors are used only under the direction of MTR staff or Emergency service personnel in the event of an evacuation

Tsuen Wan Line, Kwun Tong Line, Island Line and Tseung Kwan O Line

Tung Chung Line, Airport Express

Kwun Tong Line

West Rail Line, East Rail Line and Ma On Shan Line

East Rail Line

Emergency door release

- This is used only under the direction of the train captain in the event of an evacuation from the train compartment
- Passengers must always be aware of the immediate surroundings before evacuating from the train

Emergency procedures

Evacuation from the station

- Remain calm
- Pay attention to station announcements and electronic display messages
- Use the nearest exit as directed by MTR staff, Emergency services personnel or as indicated by illuminated exit signs to immediately exit from the station
- Use the nearest escalator or staircase to exit
- Do not use the lift

Evacuation from the train

- Remain calm
- Pay attention to train announcements and electronic display messages
- Evacuation from a train will normally take place at the nearest station
- Evacuation from a train between stations will only take place under exceptional circumstances
- Follow the instructions and directions from MTR staff or Emergency services personnel

Passengers with disabilities and those who require assistance

- Ask for assistance from other passengers
- If safe to do so, wait for MTR staff or Emergency services personnel

Emergency procedures

Fire

- Inform MTR staff immediately if you see smoke / fire or smell burning
- Offer assistance to anyone in need or help move persons with disabilities to a safe location

Fire on a train

- Report the fire to the train captain immediately using the Emergency Call handle or Call button and speaking into the microphone
- If safe to do so, use the fire extinguisher
- Do not open the ventilation windows unless instructed to do so
- In the event of a train evacuation, follow the instructions given by MTR staff or Emergency services personnel
- If there is a fire outside the train, stay inside the train compartment, remain calm and follow the instructions of MTR Staff

Fire in the station

- Report the fire to MTR staff or operate the fire alarm call point (break glass)
- Follow the instructions of MTR staff or Emergency services personnel to evacuate the station
- Do not use the lift

Be alert ! Suspicious objects

Dangerous Goods

Under the Dangerous Goods Ordinance, Dangerous Goods are classified into 10 categories. Some examples are listed below:

Category 1: fireworks, fire crackers

Category 2: LP gas, pressurised gas cylinders*

Category 3: acids, battery fluid

Category 4: paint remover, cyanides

Category 5: thinners, kerosene, petroleum (or diesel)

Category 6: raw materials of active metals (calcium, magnesium, etc)

Category 7: peroxides (such as concentrated hydrogen peroxide)

Category 8: combustible industrial raw material

Category 9: white or yellow phosphorus

Category 9a: raw polystyrene foam, raw rubber pellets, rubber tyres

Category 10: chemical processing raw materials (hardening agent for glassfibre and epoxy products)

MTR staff have the legal right to refuse entry to any part of the MTR of any passenger carrying Dangerous Goods or permitted goods in large quantities.

** Passengers who need an oxygen cylinder for breathing purposes can carry an oxygen cylinder which does not exceed 1.25 liters in volume and stored in a proper container.*

Your safety and security

All public areas of the MTR are regularly patrolled by MTR staff and the Police. Mirrors and closed circuit TV cameras are located in strategic positions to assist in deterring crime. Nevertheless, we still need your assistance to keep the railway safe.

Keep a watchful eye and take appropriate action

If you witness a crime or see something suspicious such as:

- Passengers behaving oddly
- Unattended baggage, backpack, parcels, or other objects
- Passengers carrying dangerous or flammable goods
- Any incident or anything you find suspicious or unusual

Report it to MTR staff or the Police immediately.
